US National Stage Patent Application: 10/541,345  
Title: Data Input System  
US Filing Date: 05 July 2005  
Inventor / Applicant: Michael Anthony William Prior  
International Application No: PCT/GB2004/000115  
International Filing Date: January 9, 2004  
Assignee: Action Information Technologies Limited

**TRANSMITTAL LETTER**

Attached is a supplemental Information Disclosure Statement by Applicant, listing prior art recently provided to Applicant in a British examination report, along with copies of the non-US documents and a summary below of the German document.

**DE-4015939-A1**

Title: Keyboard achieving accelerated fixing of text characters - has special layout providing lower and constant sequence groups

Abstract: An electronic keyboard is used for the rapid generation of text in alphabetic characters. The system employs the simultaneous operation of keys. The keyboard has a central group of keys used for the vowels. Two groups of keys on the left and right hand side allow the consonants before and after the vowels to be established for specific text.

Advantage: Keeps errors low.
